Allowable Subject Matter

1. Claims 1-45 are allowed.

The following is an examiner's statement of reasons for allowance:

The allowability of the independent claims 1, 12, 23, 26 and 27 resides, at least in part, in that closest prior art of record Bobkin et al. (U. S. Patent 6,732,005) does not disclose or suggest, alone or in combination, the work cell supervisor being preset as to the desired magnitude of setting torque and other information necessary for the tool to be activated and if such information is correct the workcell supervisor will then provide a signal to the monitor controller by communication between the tool transceiver and the supervisor transceiver to permit the tool to be activated for installing fasteners in the work cell but if the desired magnitude of setting torque is not correct or one of the other parameters is not correct then the tool will not be activated by the work cell supervisor, in combination with the other elements and features of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
